Height: 12 inches

Spread: 24 inches

Spacing: 18 inches

Sunlight: ○

Hardiness Zone: 3a

Edible Qualities

Golden Curly Oregano is a perennial herb that is typically grown for its edible qualities, although it does have ornamental merits as well. The crinkled round gold leaves are usually harvested from late spring to mid summer. The leaves have a pungent taste and a distinctive fragrance.

The leaves are most often used in the following ways:

- Cooking
- Seasoning

Features & Attributes

Golden Curly Oregano's attractive tiny crinkled round leaves remain gold in color throughout the year on a plant with a mounded habit of growth. It features tiny pink trumpet-shaped flowers in mid summer.

This is an herbaceous evergreen perennial herb with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect. This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Aside from its primary use as an edible, Golden Curly Oregano is sutiable for the following landscape applications;

- Border Edging
- General Garden Use
- Groundcover
- Herb Gardens
- Container Planting

Planting & Growing

Golden Curly Oregano will grow to be about 12 inches tall at maturity, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant can be integrated into a landscape or flower garden by creative gardeners, but is usually grown in a designated herb garden. It should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Golden Curly Oregano is a good choice for the edible garden, but it is also well-suited for use in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
